

Michael Granillo		2 nd Quarter	Week Beginning: October 30th
School Year: 2023-24		Subject: Algebra 1	
Monday	Notes:	<p>Objective: Students will explore solving a system of equations by substitution.</p> <p>Lesson Overview: 7.2 - Bellwork will be solving and substituting, after which we will solve systems by substituting one equation in for the x in the other equation.</p>	<p>Academic Standards: A.CED.3 A.REI.6</p>
Tuesday	Notes:	<p>Objective: Students will explore solving systems of equations by eliminating a variable using addition.</p> <p>Lesson Overview: 7.3 - Bellwork will be evaluating functions and a substitution problem, after which we will begin learning about the elimination method.</p>	<p>Academic Standards: A.CED.3 A.REI.6</p>
Wednesday	Notes:	<p>Objective: Students will apply what they learned about eliminating a variable to solving a system by multiplication.</p> <p>Lesson Overview: 7.4 - Bellwork will be solving a system by each method learned so far. Then we will build on the learning we did yesterday, but now we will have to multiply each equation in the system before we eliminate a variable.</p>	<p>Academic Standards: A.REI.5 A.REI.6</p>
Thursday	Notes:	<p>Objective: Students will use a graph to explore the solutions of a system of inequalities</p> <p>Lesson Overview: 7.5 - Bell work will be a review of graphing inequalities. Then we will take two inequalities and graph them on the same coordinate plane and discuss how the solution takes place.</p>	<p>Academic Standards: A.CED.3 A.REI.12</p>
Friday	Notes:	<p>Objective: Students will have the opportunity to review the topics from chapter 7.</p> <p>Lesson Overview: Chapter 7 review</p>	<p>Academic Standards: All the above</p>
