| Name: <br> Adam Reeck |  | Ge: Grading Quarter: Week Beginning: <br> 2   | ember 27th |
| :---: | :---: | :---: | :---: |
| School Year: 23-24 |  | Subject: Geometry |  |
| $\begin{aligned} & 3 \\ & \frac{3}{7} \\ & \frac{1}{2} \\ & \frac{2}{2} \end{aligned}$ | Notes: <br> Copy of math logs | Objective: Students find the areas of quadrilaterals by using the formulas they derive. <br> Lesson Foundations: Quadrilaterals, Area <br> Lesson Overview: Using formulas, solving for different variables in a formula <br> Review: Algebra - Solving for X <br> Bellwork: Use the internet to list every kind of quadrilateral you can think of and write down the formula for its area. Include a diagram. <br> $4 x+2 y=8$ Solve for $x$, then $y$ <br> $A=1 / 2 b h$ Solve for $b$, then $h$ <br> $A=\pi \times r^{2}$ Solve for $r$ <br> Homework: Quadrilateral Area Worksheet | Academic Standards: <br> G.MG.1, G.MG. 2 |
| $\begin{aligned} & \underset{-1}{2} \\ & 0 \\ & 0 \\ & \\ & 2 \end{aligned}$ | Notes: | Objective: Students find the areas of circles and sectors by using the formulas they derive. <br> Lesson Foundations: Area of Circles, Fraction review <br> Lesson Overview: Using formulas, solving for different variables in a formula <br> Review Worksheets - Fractions <br> Bellwork: Fraction worksheets <br> Classwork: Fraction strips, Sector area worksheet | Academic <br> Standards: G.C.5, G.GMD. 1 |

| $\begin{aligned} & \sum \\ & \underset{D}{D} \\ & \stackrel{0}{\lambda} \\ & \mathbb{D} \\ & 0 \\ & \end{aligned}$ | Notes: | Objective: Students will find surface areas of prisms and cylinders and derive their formulas. <br> Lesson Foundations: Area of Circles, Areas of quadrilaterals <br> Lesson Overview: Using formulas, solving for different variables in a formula <br> Bellwork: Check in on Scale Model projects. <br> Classwork: Worksheet on Surface area of prisms and cylinders | Academic Standards: G.MG. 3 |
| :---: | :---: | :---: | :---: |
| 극 들 $\stackrel{0}{0}$ $\stackrel{2}{2}$ | Notes: | Objective: Students will find surface areas of pyramids and cones and derive their formulas. <br> Lesson Foundations: Area of Circles, Areas of quadrilaterals <br> Lesson Overview: Using formulas, solving for different variables in a formula <br> Bellwork: Fraction worksheet. <br> Classwork: Worksheet on Surface area of pyramids and cones | Academic <br> Standards: <br> G.MG. 3 |
| $\begin{aligned} & \frac{7}{2} \\ & \stackrel{1}{2} \\ & \stackrel{1}{2} \end{aligned}$ | Notes: | Objective: Students will identify the shapes created by cuts to a crosssection of a solid. They will also identify 3-D shapes created by rotations about an axis. <br> Lesson Foundations: Rotations <br> Lesson Overview: Charcuterie plate - cheese, crackers, <br> Bellwork: What is a cross section? What happens when a two-dimensional object is rotated around a line very quickly? What kind of object is "formed?" <br> Classwork: Eat Cheese and Crackers | Academic Standards: G.GMD. 4 |

## Think about doing something with exploration
