

Name: Schimmel, Gagnon, Moon		Grading Quarter: 3 Week: 2	Week Beginning: Week 2 01/15/2024-01/19/2024
School Year: 2023-2023		Subject: 5 th Science	
Monday	Notes:	Objective: NO SCHOOL!!	Academic Standards:

Tuesday	Notes:	<p>Objective:</p> <ul style="list-style-type: none"> • Students will use what they learn about Earth's Patterns and movements to design a planetarium model. • Students will choose a pattern to model for their project: length and direction of shadow, day and night, phases of the Moon, or seasonal changes. • Students will support an argument that gravity causes objects to be pulled down toward the center of Earth. <p>Lesson Overview:</p> <p>Inspire Science Unit 4: Earth and Space Patterns Lesson 1: The Role of Gravity Earth's Gravity predictions Earth Highlights video Learning about the 8 planets overview Barringer Crater: What caused this crater to form? The Pull of Earth's Gravity Gravity on Other Planets worksheet: Students are to take their weight and use the Math and Science formulas/equations to calculate their weight and age one each of the 8 planets. Then analyze and answer correlation questions based on student's data.</p> <p>Vocabulary: Gravity, crater, tides, meteor, meteorite</p>	<p>Academic Standards:</p> <p>5.P3U1.4 Obtain, analyze, and communicate evidence of the effects that balanced and unbalanced forces have on the motion of objects.</p> <p>5.P3U2.5 Define problems and design solution pertaining to force and motion</p> <p>5.E2U1.8 Obtain, analyze, and communicate evidence to support an explanation that the gravitational force of Earth on objects is directed toward the planet's center.</p> <p>5.SL.4 Report on a topic or text or present an opinion, sequencing ideas logically and using appropriate facts with relevant, descriptive detail to support main ideas or themes; speak clearly at an understandable pace.</p>
