MIchael Granillo	**3ʳᵈ Quarter**	**Week Beginning: January 22**	
School Year: 2023-24	**Subject: Algebra 2H**		

	Notes:	Objective: Students will add to their system solving tools by adding substitution and elimination. Lesson Overview: 2.5 - Students will solve systems of equations, using both elimination and substitution, and be able to decide when to use each.	Academic Standards: A.CED.3
Monday			
Tuesday	Notes:	Objective: Students will apply what they have learned about solving systems of equations to solving systems of inequalities. Lesson Overview: 2.6 - We will review how to graph a linear inequality, and then use that to solve a system of inequalities.	Academic Standards A.CED.3
Wednesday	Notes:	Objective: Students will solve 3 variable systems by applying the techniques learned in the previous sections. Lesson Overview: 2.8 - Students will be introduced to solving systems with 3 variables.	Academic Standards: A.CED.3
Thursday	Notes:	Objective: Students will graph absolute value equations to find the solution. Lesson Overview: 2.9 - We will learn how to graph absolute value equations, find where they cross the x-axis, and interpret the solution.	Academic Standards: A.CED.1
Friday	Notes:	Objective: Students will review the topics of Chapter 2 Lesson Overview: Chapter 2 Review	Academic Standards: All the above
