|------------------------|--------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Name: 1st Grade | | Grading Quarter: 3 | Week Beginning: Feb. 10 |
| School Year: 2024-2025 | | Subject: Science | |
| Monday | Notes: | Objective: Students will read and discuss the definition of illuminate. Lesson Overview: Students will read text on page 14 and compare photos of illumination. We will watch the video "Cave Exploration" to learn how light can be used in dark places and write what objects provide illumination on page 15. | Academic Standards: PS4-2 Make observations to construct an evidence-based account that objects in darkness can be seen only when illuminated. |
| | Notes: | Objective: Students will observe a beam of light to determine how light travels. Lesson Overview: Students will complete exploration on pages 16-17 with baby powder and a flashlight. | Academic Standards: PS4-3 Plan and conduct investigations to determine the effect of placing objects made with varied materials in the path of a beam of light. |
| | Notes: | Objective: Students will apply their learning to show their understanding of light. Lesson Overview: Students will complete review pages 18-20. | Academic Standards: PS4-2 Make observations to construct an evidence-based account that objects in darkness can be seen only when illuminated. |
