

Name: 1st Grade		Grading Quarter: 4	Week Beginning: April 1
School Year: 2024-2025		Subject: Science	
Monday	Notes:	Objective: Students will summarize a story. Lesson Overview: Students will listen to “Lighs in the Sky” and record their summaries on workbook page 15.	Acedemic Standards: ESS1-1 Use observations of the sun, moon, and stars to describe patterns that can be predicted.
	Notes:	Objective: Students will analyze the objects in the sky. Lesson Overview: Students will read “Telescopes and the Night Sky” and show similarities between stars, interpret information and describe how the moon and earth do not shine on their own.	Acedemic Standards: ESS1-1 Use observations of the sun, moon, and stars to describe patterns that can be predicted.
	Notes:	Objective: Students will review information learned in Lesson 1. Lesson Overview: Students will complete pages 22-24 to explain the phenomenon.	Acedemic Standards: ESS1-1 Use observations of the sun, moon, and stars to describe patterns that can be predicted.
	Notes:	Objective: Students will show what they know. Lesson Overview: Students will complete the lesson check test.	Acedemic Standards: ESS1-1 Use observations of the sun, moon, and stars to describe patterns that can be predicted.
Tuesday	Notes:	Objective: Students will review information learned in Lesson 1. Lesson Overview: Students will complete pages 22-24 to explain the phenomenon.	Acedemic Standards: ESS1-1 Use observations of the sun, moon, and stars to describe patterns that can be predicted.
	Notes:	Objective: Students will analyze the objects in the sky. Lesson Overview: Students will read “Telescopes and the Night Sky” and show similarities between stars, interpret information and describe how the moon and earth do not shine on their own.	Acedemic Standards: ESS1-1 Use observations of the sun, moon, and stars to describe patterns that can be predicted.
	Notes:	Objective: Students will summarize a story. Lesson Overview: Students will listen to “Lighs in the Sky” and record their summaries on workbook page 15.	Acedemic Standards: ESS1-1 Use observations of the sun, moon, and stars to describe patterns that can be predicted.
	Notes:	Objective: Students will show what they know. Lesson Overview: Students will complete the lesson check test.	Acedemic Standards: ESS1-1 Use observations of the sun, moon, and stars to describe patterns that can be predicted.
Wednesday	Notes:	Objective: Students will review information learned in Lesson 1. Lesson Overview: Students will complete pages 22-24 to explain the phenomenon.	Acedemic Standards: ESS1-1 Use observations of the sun, moon, and stars to describe patterns that can be predicted.
	Notes:	Objective: Students will analyze the objects in the sky. Lesson Overview: Students will read “Telescopes and the Night Sky” and show similarities between stars, interpret information and describe how the moon and earth do not shine on their own.	Acedemic Standards: ESS1-1 Use observations of the sun, moon, and stars to describe patterns that can be predicted.
	Notes:	Objective: Students will summarize a story. Lesson Overview: Students will listen to “Lighs in the Sky” and record their summaries on workbook page 15.	Acedemic Standards: ESS1-1 Use observations of the sun, moon, and stars to describe patterns that can be predicted.
	Notes:	Objective: Students will show what they know. Lesson Overview: Students will complete the lesson check test.	Acedemic Standards: ESS1-1 Use observations of the sun, moon, and stars to describe patterns that can be predicted.
Thursday	Notes:	Objective: Students will review information learned in Lesson 1. Lesson Overview: Students will complete pages 22-24 to explain the phenomenon.	Acedemic Standards: ESS1-1 Use observations of the sun, moon, and stars to describe patterns that can be predicted.
	Notes:	Objective: Students will analyze the objects in the sky. Lesson Overview: Students will read “Telescopes and the Night Sky” and show similarities between stars, interpret information and describe how the moon and earth do not shine on their own.	Acedemic Standards: ESS1-1 Use observations of the sun, moon, and stars to describe patterns that can be predicted.
	Notes:	Objective: Students will summarize a story. Lesson Overview: Students will listen to “Lighs in the Sky” and record their summaries on workbook page 15.	Acedemic Standards: ESS1-1 Use observations of the sun, moon, and stars to describe patterns that can be predicted.
	Notes:	Objective: Students will show what they know. Lesson Overview: Students will complete the lesson check test.	Acedemic Standards: ESS1-1 Use observations of the sun, moon, and stars to describe patterns that can be predicted.

Friday	Notes:	Objective: NO SCHOOL Lesson Overview:	Academic Standards: ESS1-1 Use observations of the sun, moon, and stars to describe patterns that can be predicted.
