

Name: Mr. Kurt Kerr		Grading Quarter: Fall 2 nd Qtr.	Week Beginning: Week 2 10/23-10/27
School Year: 23/24		Subject: Earth Science	
Monday	Notes:	Objective: Students will identify volcanoes based on their physical properties. Lesson Overview: Virtual tour of local volcanic necks, dykes, and sills	Academic Standards: S1-C1-PO1 S1-C3-PO3,5 S1-C4-PO2,3,4,5
Tuesday	Notes:	Objective: Students will demonstrate their understanding of volcanoes and the ir resulting landforms via a chapter test. Lesson Overview: 30 Q. Multiple choice test	Academic Standards: S1-C1-PO1 S1-C3-PO3,5 S1-C4-PO2,3,4,5
Wednesday	Notes:	Objective: Students will seek to understand the forces that move the earth's crust Lesson Overview: Students will compare and contrast stress, strain, deformation and faulting.	Academic Standards: S1-C1-PO1 S1-C3-PO3,5 S1-C4-PO2,3,4,5
Thursday	Notes:	Objective: Students will identify and describe the movement and landforms created by the forces within the earth. Lesson Overview: Students will describe and diagram the land deformations anticline, synclines, and monoclines	Academic Standards: S1-C1-PO1 S1-C3-PO3,5 S1-C4-PO2,3,4,5

Friday	Notes:	<p>Objective: Students will identify and describe the movement and landforms created by the forces within the earth.</p> <p>Lesson Overview: Students will describe and diagram normal, reverse, and transform earthquake faults.</p>	<p>Academic Standards:</p> <p>S1-C1-PO1 S1-C3-PO3,5 S1-C4-PO2,3,4,5</p>
